If the present trend in increase of population, urbanisation and industrialisation continues then the world in the year 2050 AD will be more crowded and more polluted than what it is at the moment. According to conservative estimates by 2050 AD population will increase to 9.7 billion to make the situation worst, for the poor countries, 90 percent of the increase in population will be in the poor countries. It will widen the gap between the rich and the poor countries. Due to tremendous increase in the population more areas will be used for dwelling which may lead to reduction in the area under cultivation. So any increase in the agriculture production will not be due to increase in the area under cultivation but by advancement in the agricultural technology.

With such great pressure on land for habitation unhygienic particularly in big cities as the civic authorities may not be able to cope up with the problem. Increased demand for consumer goods will not only gear up production of the existing industries but also demand setting up for more industries. This will lead to greater pollution than even before. Scarcity of water in urban centres and in the industrial town will be another problem of the future. Direction: Read the following passage carefully and answer the questions given below.

But I did not want to shoot the elephant. I watched him beating his bunch of grass against his knees, with the *preoccupied grandmotherly* air that elephants have. It seemed to me that it would be murder to shoot him. I had never shot an elephant and never wanted to. (Somehow it always seems worse to kill large animal.) Besides, there was the beast's owner to be considered. But I had got to act quickly. I turned to some experienced-looking Burmans who had been there when we arrived, and asked them how the elephants had been behaving. They all said the same thing; he took no notice of you if you left him alone, but he might charge if you went too close to him.

Direction : Read the following passage carefully and answer the questions given below.

What needs to be set right is our approach to work? It is a common sight in our country of employees reporting for duty on time and at the same time doing little work. If an assessment is made of time they spent in gossiping, drinking tea, eating "pan" and smoking cigarettes, it will be shocking to know that the time devoted to actual work is negligible. The problem is the standard which the leadership in administration sets for the staff. Forget the ministers because they mix politics and administration. What do top bureaucrats do? What do the below down officials do? The administration set up remains weak mainly because the employees do not have the right example to follow and they are more concerned about being in the good books of the bosses than doing work.
